

# ProMax

Spray-dried bovine plasma

## Description:

**ProMax** is spray-dried bovine plasma that is marketed by International Ingredient Corporation. ProMax is a flowable, light cream-colored product that provides highly-digestible amino acids to young animals, including livestock and pets. ProMax contains functional proteins, such as immunoglobulins, that are beneficial to the health and growth performance of young animals.

## Analysis:

	Typical Value
Crude protein, %	72.0
Lysine, %	6.36
Met + Cys, %	3.52

## Features:

- Food-grade quality source of spray-dried bovine plasma
- 100% bovine origin
- Collected from cattle at USDA-inspected facilities in Nicaragua
- Dried in a USDA- and HACCP-certified facility
- Highly soluble (>95%)
- Excellent product flowability
- Rich source of immunoglobulins and functional components of plasma to maximize feed intake and intestinal health of young animals.
