

FiberMax-7

Description:

FiberMax-7 is an all-natural source of functional insoluble fiber that supports normal digestive function in pets, livestock, and poultry. FiberMax-7 is derived from *Miscanthus* grass, a perennial warm-season grass that is harvested in the USA (primarily the states of Missouri and Arkansas). It is a natural, non-GMO product that is available in ground and pelleted forms. FiberMax-7 absorbs 7 times its weight in water, which is key to its beneficial effect on digestive function.

Analysis:

	Typical Value
Total dietary fiber, %	81.2
Insoluble fiber, %	80.9
Crude Fiber, %	48.3

Features:

- Functional insoluble fiber
- Natural, non-GMO
- Ground and pelleted forms
- Environmentally-responsible crop
- Traceability
- Price stability
- Digestive tract benefits in the upper and lower GI.
