

Brown Sugar Food Product

Description:

Brown Sugar Food Product is a unique complex of simple sugars, oligosaccharides, and starches that provides a rapidly fermentable energy source for the rumen. Brown Sugar Food provides a pleasant, sweet taste to the feed, enhancing palatability and feed intake. The end result of improved feed intake and enhanced protein utilization is stimulation in milk production in dairy cows. Typical inclusion rate is 1-3% (0.5 to 2.0 lb./head/day) in the final diet.

Analysis:

	Typical Value
Total Sugar, %	80.0
NFE (NFC), %	90.0
TDN, %	87.1
NE _L , kcal/lb.	921

Features:

- Rapidly fermentable sugars and starch to support VFA production
- When fed with soluble nitrogen source, improve microbial protein synthesis
- Pleasant, sweet taste to encourage feed intake
- Greater milk production
- Available in bags, totes and bulk
