

Cheese Whey

Description:

Cheese Whey is an “All Dairy” nutrient-rich animal feed ingredient that provides highly digestible nutrients in combination with all the benefits of a natural cheese taste and aroma. Protein, lysine and lactose levels in Cheese Whey are comparable to dried whey, while the fat and energy values are superior. Cheese Whey is an excellent ingredient for swine starter diets and can replace dried whey on a one-to-one basis, giving credit for the higher energy level of Cheese Whey. Typical inclusion levels range between 5-25% of the diet, depending on the age and weight of the animal.

Analysis:

	Typical Value
Crude Protein, %	11.5
Crude Fat, %	5.5
Lactose, %	65.0

Features:

- All Dairy”
- Excellent source of quality nutrients (protein, fat and lactose)
- Superior energy levels compared to dried whey
- Natural cheese taste and aroma
- Improves palatability and feed intake
- Economically replaces dried whey and artificial flavors
- Research proven
- Available in multiple sizes including bags, totes, and bulk
- Accepted world-wide as a quality feed ingredient
