

Chocolate Candy Feed

Description:

Chocolate Candy Feed is a high-quality feed ingredient containing chocolate, high sugar candies and other chocolate food products. Chocolate Candy is high in fat and readily digestible sugars, making it an energy-rich ingredient for nursery pigs and lactating sows' The Typical inclusion levels range between 5 – 10% in starter nursery diets and sow lactation diets.

Analysis:

	Typical Value
Crude Protein, %	7.0
Crude Fat, %	10.0
Total Sugars, %	50.0

Features:

- Excellent source of quality nutrients (protein, fat and sugars)
- High nutrient density
- Improves palatability and feed intake
- Economically replaces artificial flavors
- Research proven
- Excellent product flowability
- Available in multiple sizes including bags, totes, and bulk
- Accepted world-wide as a quality feed ingredient
