

Five Star Booster

Description:

Five Star Booster is a unique complex of highly digestible sugars, oligosaccharides, organic acids, and natural flavors that improves pig performance. Five Star Booster contains citric acid and other organic acids, resulting in a product pH of 3.5 (in 10% aqueous solution). The recommended inclusion rate ranges from 5% to 10% in pig starter feed.

Analysis:

	Typical Value
Total Sugar, %	80.0
Ash, %	3.0
Moisture, %	4.5

Features:

- Natural sweet taste and fruity aroma improves palatability of feed
- Organic acid component contributes to a low intestinal pH in pig
- Unique profile of highly digestible sugars
- High readily available energy to weaned pig
- Exhibits research-proven benefits on pellet durability of pig starter feeds
- Available in multiple sizes including bags, totes, and bulk
