

GroBiotic® A

Description:

GroBiotic® A is a prebiotic and immuno-stimulant that has been shown to enhance growth, feed efficiency, survivability, and immune function, while positively altering gastrointestinal microbial populations and increasing nutrient digestion of plant protein based diets. GroBiotic® A is proven effective during exposure to a variety of stressors, including bacterial (*Streptococcus iniae*, *Mycobacterium marinum*, *Flavobacterium columnare*), viral (IHNV), poor water quality, low salinity (shrimp), and general commercial conditions. GroBiotic® A is formulated to enhance growth performance and survivability of aquatic species under normal and stress conditions. Typical inclusion levels range between 1-2% of the diet.

Analysis:

	Typical Value
Crude Protein, %	32.0
Crude Fat, %	1.5
Crude Fiber, %	2.0

Features:

- ✓ All-natural prebiotic and immune-stimulant for healthy and stressed aquatic species.
- ✓ Research proven in shrimp, tilapia, catfish, trout, hybrid striped bass, red drum, golden shiners (baitfish) and other fish species.
- ✓ Improved weight gain and feed efficiency.

Research:

- IIC Research Bulletin.
