

LES-70

Description:

LES-70 (Lactose Equivalent Sugars) is a high-quality animal feed ingredient produced from sugar food ingredients and candy from the food industry. It is a highly digestible and palatable ingredient which is an economical replacement for lactose and other sugars in swine diets. LES-70 contains citric acid and other organic acids, resulting in a product pH of 3.5 (in 10% aqueous solution). The recommended inclusion rate ranges from 5% to 15% in pig starter feeds.

Analysis:

	Typical Value
Total Sugars, %	70.0
Ash, %	3.0
Protein, %	2.0

Features:

- Natural sweet taste and fruity aroma improves palatability of feed
- Organic acid component contributes to a low intestinal pH in pig
- Unique profile of highly digestible sugars
- High readily available energy to weaned pig
- Research-proven benefits on pellet durability of pig starter feeds
- Available in multiple sizes including bags, totes, and bulk
