

Milk Chocolate Product

Description:

Milk Chocolate Product is a high-quality feed ingredient containing real chocolate from the chocolate and candy food industries. It is an excellent ingredient to improve the nutrient quality and palatability of swine starter feeds. Milk Chocolate Product can replace dried whey and artificial flavors at typical inclusion rates of 5 to 15% of the diet.

Analysis:

	Typical Value
Crude Protein, %	12.0
Crude Fat, %	6.5
Total Sugars, %	60.0

Features:

- High nutrient density
