

Dried Cheese

Description:

Dried Cheese is a high quality, palatable ingredient produced by spray-drying cheese and is an excellent source of milk proteins and milk fat for the young pig, calf, cat, and dog foods. Typical inclusion levels range between 1-15% of the complete diet.

Analysis:

	Typical Value
Crude Protein, %	30.0
Crude Fat, %	40.0
Ash, %	11.0

Features:

- Great cheesy aroma
