

# OptiStrum

## Description:

**OptiStrum** is a nutrient dense dairy ingredient containing highly digestible colostrum casein and fat designed to support optimum health and growth of the young calf. The raw material for OptiStrum is collected from freshly calved dairy cows within the first 48 hours post calving. The recommended inclusion rate ranges from 1% to 10% in calf milk replacers.

## Analysis:

	Typical Value
Crude Protein, %	41.0
Crude Fat, %	44.0
Ash, %	8.0

## Features:

- Nutrient dense.
- Contains colostrum casein and fat from freshly calved cows.
- All dairy milk proteins.
- Highly digestible fat with naturally occurring butyrate acid, medium chain fatty acids and polyunsaturated fatty acids.
- Contains immunological components important for the young calf.
- Spray dried.
- Excellent solubility
- Available in bags and totes
