

Dried Cheese MR

Description:

Dried Cheese MR is a high-quality animal feed ingredient produced by spray-drying cheese. Dried Cheese MR is an excellent source of milk proteins and milk fat, with a pleasant cheese taste. Dried Cheese MR can be used to provide a soluble source of milk proteins and milk fat in calf and veal milk replacer applications. Typical inclusion level range between 5-30% of the diet, depending on the usage and weight of the animal.

Analysis:

	Typical Value
Crude Protein, %	31.0
Crude Fat, %	41.0
Ash, %	11.0

Features:

- High quality dairy (casein) protein and milk fat
- Excellent solubility for mixing into liquid applications
