

RumenGro

Description:

RumenGro is a unique product consisting of milk sugars, oligosaccharides, and natural organic acids. RumenGro can be used as a functional sugar source in the starter for growing calves and can add to or replace other sources of sugar in the starter formulation. RumenGro is highly palatable with a sweet milk taste. Typical inclusion levels are 5-15% in calf starter diets.

Analysis:

	Typical Value
Total Sugars & Oligosaccharides	84.0
Crude Protein, %	3.0
Total Organic Acids, %	6.0

Features:

- Consistent, high sugar & oligosaccharide content
- Dried fresh daily to ensure no deterioration of nutrients
- Granular, non-hygroscopic, free-flowing particles
- Available in multiple sizes including bags, totes, and bulk
- Research-proven, economical sugar source for calf feeds
