

Minced Catfish

Description:

Our Wild-Caught Fresh Frozen Minced Catfish is a high-quality protein, ideal for pets with sensitivity. Sourced from the Chesapeake Bay, Blue Catfish is an invasive species, and its responsible harvest supports environmental sustainability while delivering premium nutrition and palatability. Naturally rich in omega-3s, this food-grade ingredient provides traceability, ethical sourcing, and consistency, aligning with the demand for clean-label pet food formulations. Harvested in the U.S. and fresh frozen to preserve nutrient integrity, it delivers a stable, year-round supply, making it a sustainable option for premium pet food applications. This ingredient enhances both ethical impact and nutritional value. Product available in 20-60 lb. frozen nude blocks.

Analysis:

	Typical Value
Crude Protein, %	15.0
Crude Fat, %	11.0
Moisture, %	74.0
Ash, %	0.90

Features:

- Human food-grade processing, maintaining the highest standards of quality and safety.
- Minced only from fresh-cut catfish filets, guaranteeing purity and consistency in formulation.
- Premium, novel protein alternative to salmon and whitefish, ideal for pets with sensitivity.
- Natural omega-3s support skin, coat, and joint health while promoting overall well-being.
- Sustainably harvested invasive species, supporting environmental balance.
- Fresh frozen for optimal nutrient retention.
