

# RumenGro™

Functional Nutrition

## Description:

**RumenGro™** is a next-generation technology created to jump-start rumen health and development. Our proprietary drying process produces a unique blend of  $\beta$ -lactose and organic acids, delivering targeted nutrients that calves can readily utilize when they need it most. By enhancing palatability, supporting rumen maturation and improving starter intake, RumenGro™ sets calves up for stronger lifetime performance. Typical inclusion rates range from 5-15% in calf starter diets.

## Analysis:

	Typical Value
Total Sugars	80.0
Total Organic Acids, %	6.0
Protein, %	3.0
Moisture, %	3.0
Ash, %	9.0

## Features:

- **Consistent Quality** – Product dried fresh daily ensuring no nutrient deterioration and a consistent nutrient profile
- **Palatability** – Unique drying process produces a high level of  $\beta$ -lactose – the sweetest form of lactose – enhancing palatability and improving calf feed intake
- **Targeted Nutrition** – Consists of granular, non-hygroscopic particles formulated to provide high levels of  $\beta$ -lactose and organic acids that promote rumen development
- **Research-Proven** – Researched and proven to be an effective, functional feed ingredient in calf feeds
- **Pellet Binding** – Naturally high sugar content improves pellet durability and quality, reducing fines
