

Wild-Caught Catfish

Description:

Our Wild-Caught Fresh Frozen Minced Catfish is a premium, food-grade protein option for pets with sensitivities. Sourced from responsibly harvested Chesapeake Bay Blue Catfish, an invasive species, it supports environmental balance while providing strong nutrition and palatability. Naturally rich in omega-3s, this U.S.-harvested ingredient offers traceability, ethical sourcing, consistent quality, and clean-label appeal. Fresh frozen to help preserve nutrient integrity, it provides a dependable year-round supply for premium pet food applications. Available in 20–40 lb. frozen nude blocks.

Analysis:

	Typical Value
Crude Protein, %	15.0
Crude Fat, %	11.0
Moisture, %	74.0
Ash, %	0.90

Features:

- Human food-grade processing, maintaining the highest standards of quality and safety.
- Minced only from fresh-cut catfish filets, guaranteeing purity and consistency in formulation.
- An alternative premium protein to salmon and whitefish.
- Natural omega-3s support skin, coat, and joint health while promoting overall well-being.
- Sustainably harvested invasive species, supporting environmental balance.
- Fresh frozen for optimal nutrient retention.
